Intelligence

ACTIVATING HEALTHCARE DATA TO IMPROVE OUTCOMES

Pareto Intelligence supports health plans and providers with analytics, technology and advisory solutions to improve value-based outcomes.

Who We Serve:
- Commercial Payers
- Medicare and Medicaid
- Provider-Sponsored Plans
- Risk-Bearing Providers

Healthcare Data Integration

Harmonizing disparate clinical, claims, and social determinants of health data sources to enable complex analysis and drive informed decisions.

- Ingest: Ingestion and cataloging of all healthcare data sources
- Enrich: Creating semantic interoperability to derive meaningful insights from various data sources
- Member 360°: Longitudinal view of a member's health status

Revenue & Payment Integrity

Ensuring complete, accurate and compliant data collection and submission to optimize revenue capture.

- Risk documentation improvement
- Encounter data integrity
- Premium integrity
- Payment integrity (e.g., pre- and post-payment solutions)
- Value-based revenue accuracy for providers

Applied Analytics

Activating client data through proprietary analytics, data modeling and expert advisory to improve performance.

- Analytic model library: Apply 100+ processing, profiling and predictive models to unlock insights
- Spotlight: Assess market dynamics and the competitive landscape
- Frontier: Evaluate the drivers of financial performance to inform product decisions

Pareto Engage

Modernizing the way healthcare data is communicated with providers to improve clinical, quality and risk outcomes.

- Bi-directional exchange of member data with providers directly in EHRs and current workflows
- Deliver the right information to the right providers at the ideal time to impact behavior and achieve the desired outcome

OUR EXPERIENCE

5:1 ROI
on average with some achieving over
**10:1 ROI**

14M+
covered lives across Commercial, ACA, MA & Medicaid

$150B+
amount of data analyzed by our proprietary analytic models

$2.5B+
in financial opportunity identified by our solutions

POWERED BY THE PARETO PLATFORM

Our purpose-built data management architecture seamlessly collects, aggregates, enriches and presents disparate clinical and administrative data sources to deliver analytics and technology solutions to our clients, while also employing artificial intelligence and machine learning to refine our models and improve predictability of our analytics as new data is ingested and processed.

Our ability to ingest and standardize any and all healthcare data, including social determinants of health, creates a comprehensive view of member health status to empower our clients to make informed, data-driven decisions.

Pareto Intelligence has earned Certified status for information security by HITRUST.

Systems that are HITRUST CSF Certified include fileshare system, databases, web applications, and supporting infrastructure.

WHY PARETO INTELLIGENCE

More than a technology company.

We partner with you to maximize outcomes and return on your investments.

Committed to security.

Not only are we HITRUST certified, but we also protect your data through at-rest encryption, annual penetration tests and more.

Not a "black box."

We understand your need for accessibility to the insights we provide, and we give you that access in a manner most relevant to you.

Meeting you where you are.

We are flexible and configurable to easily integrate with your existing structure.

Insights inspiring action.

We show you what to do with the insights you've acquired and provide the solutions necessary to independently execute.

Redefining Technology & Services, Together.

convey™

With extensive expertise, powerful technology and robust data analytics, the Convey Family of Companies delivers integrated, end-to-end healthcare solutions to achieve meaningful results.
