REVENUE + PAYMENT INTEGRITY
DATA INTEGRITY SOLUTION

Achieve Complete, Accurate and Compliant Encounter Processes

The complex nature of the encounter data process creates many issues for health plans. Gone unresolved, data quality issues can have a negative impact on performance.

COMPLIANCE EXPOSURE
CMS is increasing audit scrutiny on health plans in all regulated markets.

LOWER FINANCIAL REIMBURSEMENT
Underreported risk has an average $30-$50 PMPY impact for the MA and ACA markets.

INCORRECT MEMBER INSIGHTS
Plans acting on an incorrect member profile results in wasted efforts and administrative expense.

Pareto Intelligence's Data Integrity solution offers a comprehensive analysis of end-to-end encounter data accuracy to automate and prioritize gaps for remediation.
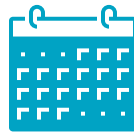

Financial Exposure Quantification *to determine the value of data discrepancies and prioritize remediation.*

Encounter-Level Data Evaluation *to identify and prioritize where data quality issues exist.*

Root Cause Investigation *through advanced clustering algorithms to resolve issues at the source.*

Web-Based Tool Access *with actionable insights into current performance and allowing for additional data exploration.*

Compliance Evaluation *to identify potential under- and over-reported encounter submissions.*

*Our Data Integrity delivery approach is flexible, with multiple options to meet your specific needs.*

ONE-TIME EVALUATION

- Independent risk score evaluation to identify variances between datasets
- Encounter-level data trace across each dataset
- Quantified financial impact
- Compliance risk evaluation
- Consultation with your team to understand known issues and support remediation

ONGOING SUBSCRIPTION

- All components of the one-time evaluation, plus:
  - Run-over-run performance evaluation and trend reporting
  - Additional reports to facilitate investigation and remediation
  - Advisory support throughout the submission process

OPERATIONAL EVALUATION

- End-to-end operational evaluation of people, processes and technology
- Assessment of operational controls
- Identification of risk areas and remediation recommendations
- Shared market-leading best practices

OUR EXPERIENCE

20:1 ROI average for clients in the MA and ACA markets.

4 MILLION members across MA, ACA and Medicaid evaluated in 2018 alone.

60% TO 85% of data quality issues exist pre-submission, requiring a holistic evaluation of encounter data processes.

100% of Pareto's Data Integrity engagements lead to improved financial accuracy.

WHY PARETO INTELLIGENCE

Compliant
We focus on complete and accurate encounter data to mitigate compliance exposure.

Transparent
Our solution is not a "black box"; we provide transparency into the analytics and outcomes of our evaluation.

Flexible
We configure all outputs to align with specific operational needs and support remediation activities.
